Projects

1). QuickChat – Real-Time Chat Application

Tech Stack: React, Node.js, Express, MongoDB, Socket.io, Cloudinary, Tailwind CSS

Engineered a **full-stack, real-time chat application** using React, Node.js, Express, and Socket.io, enabling instant messaging and image sharing. Designed a **responsive and intuitive UI** with Tailwind CSS, implemented robust authentication, and managed user profiles, showcasing end-to-end product development capabilities.

2). Employee Management System (DBMS)

Tech Stack: Python, MySQL, XAMPP

Designed and developed a **console-based Employee Management System** using Python and MySQL, implementing **comprehensive CRUD operations** and employee promotion functionalities. Ensured **data integrity** through rigorous input validation (email/phone formats) and efficient record management via custom SQL queries, demonstrating strong database and backend development skills.

3). AI Chatbot - Web Application

Tech Stack: HTML,CSS, JavaScript, Gemini Api

Created a **responsive AI Chatbot web application** leveraging HTML, CSS (Tailwind), and JavaScript, featuring persistent chat history and a user-friendly interface. Utilized **Gemini API for intelligent responses**, ensuring cross-device compatibility and adherence to best practices in API integration.
